PROBLEM STATEMENT

- Low-income community members face many necessities regarding food, clothing and hygiene items.
- A study done by Harvard University attributes "Lack of information or knowledge" as the leading reason behind this issue.

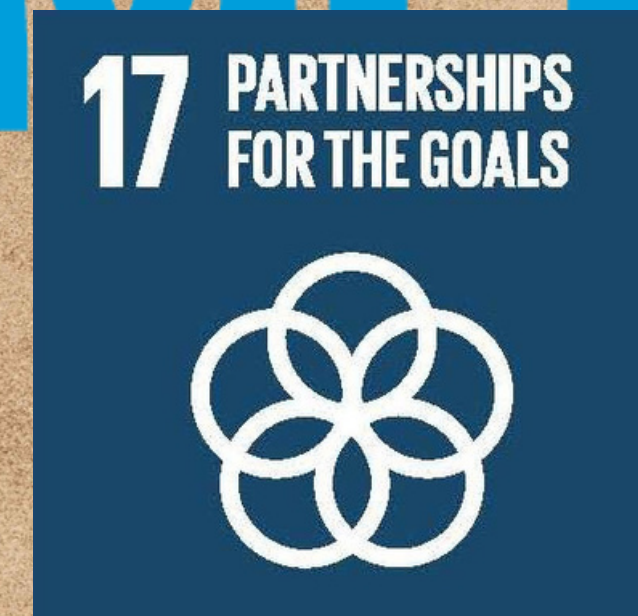

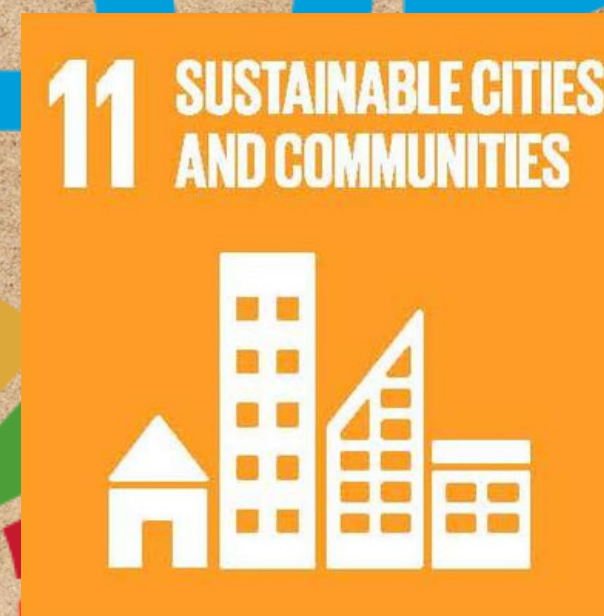

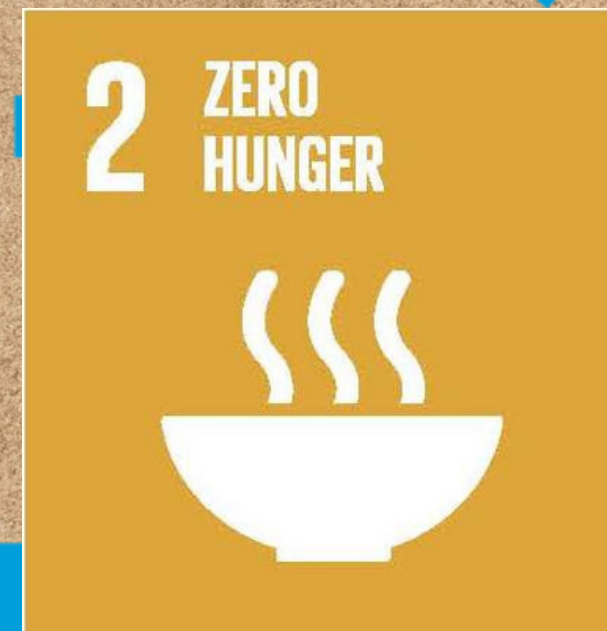

SOLUTION

Donor - Recipient Bond

- Non-profits & charities connect with users
- Creation of events(ie food drives)
- User requests
- GPT Analysis

OUR SUSTAINABLE GOALS

FEEDBACK FROM THE MARKET

Robert E & Evelyn
McKee Found

"Very beneficial to
the community since a
lot of people aren't
aware of these
resources."

El Paso Community
Foundation

"I think it's a brilliant
idea, our website is not
too accessible and
difficult to use."

EL PASO
COMMUNITY
FOUNDATION

Rebuilding Together

"A good application that
would help us share "She
Builds" where women can
get access to household
materials & training."

FUNDACION PEDRO ZARAGOZA A.C

SUMMARY

- Veronica Jimenez, President of a non-profitable that operates on both sides of the border.
- Believes the app will be a great tool that allows organizations to connect with people in need as well as those who want to support the community.

TECHNOLOGY

The app was developed using the following:

- Google Firebase
- Google Flutter
- Google Dart PL
- OpenAI GPT3

Roadblocks:

- Connecting with Organizations
- Merging GPT API into Flutter
- Utilizing new platforms to execute project

LIVE DEMO
